-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1732

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2.Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Piccolo (6,439,536). Piccolo, in a discussion of a prior art method at column 2, lines 5-16, discloses or suggests the basic claimed method for making a foam sheet having ventilation holes including preparing a mold including upper and lower mold parts separably closed to each other so as to define a mold cavity, and providing the mold with a plurality of pins (column 2, line 8) extending into the mold cavity, placing foamable material into the mold cavity and piercing the foamable material through the use of the pins, and foaming the foamable material to form a foam product while piercing the foamable material. Note column 2, lines 5-16 and Figure 4. While the use of pins is not the preferred embodiment of Piccolo, it would have been obvious to one of ordinary skill in the art to use a mold having projecting pins to form an article with ventilation holes using the pins, so long as the foaming reaction was not particularly fast and the foam did not continue to expand after removal from the mold, based on the discussion of Piccolo at column 2, lines 13-16.

The examiner takes Official Notice that it is known to cool a molded article, to remove a product from a mold and to divide a foam product, as in claims 10-12, the latter occurring when a plurality of products are formed in a single mold cavity.

3.Claims 1-8 are allowed.
